IN COLLABORATION WITH

STRATEGIC LEADERSHIP IN THE AGE OF AI

DAY ONE

Practise

Build a working mental model of AI, then use it on real leadership work: prompts, proposals, data and workflows.

DAY ONE - MODULES 1 TO 5

Foundations and practical application

1

Demystifying AI: The Executive Mental Model

What can it truly do, and where does it quietly fail?

- What AI is, how it works, and where it fails
- Separating real capability from hype
- The questions every leader should ask, including **who benefits and who bears the risk**

2

Executive Prompt Engineering Masterclass

How do I get reliable work from AI, every time?

- A reusable framework for clear, reliable prompts
- Prompts for analysis, writing and decision support
- Live practice on your own leadership tasks

3

From Raw Thoughts to Polished Proposals and Presentations

How do I go from rough notes to a board-ready paper?

- Turn rough notes into structured documents
- Build proposals, board papers and slide decks
- Refine AI output with judgement: **your voice, your accountability**

4

Data to Decisions: Spreadsheets to Interactive Dashboards

What are my own numbers trying to tell me?

- Analyse business data without complex formulas
- Generate charts and dashboards from a spreadsheet
- Ask better questions, and check the answers

5

Workflow Automation and Emerging AI Agents

What should we automate, and what should stay human?

- Map a workflow and find what can be automated
- How AI agents work, where they fit, and their realistic limits
- Redesign work so **people do more meaningful work**, not merely more work

HOW WE LEARN

Hands on, every hour. Each module is practised, not presented. Bring your laptop.

Your real work. Your own tasks, documents and data are the material we learn on.

Malaysian context. Local regulation, local examples and local stakes throughout.

Human review, always. No AI output is trusted until a person has checked it.

*Efficiency is what AI gives you. **Wisdom is what you must bring to it.***

9th & 10th December 2026

IN COLLABORATION WITH

STRATEGIC LEADERSHIP IN THE AGE OF AI

DAY TWO

Decide, govern, plan

Choose where to invest, set humane guardrails, understand Malaysian governance, and leave with a 90-day plan.

Strategic decisions, governance and execution

DAY TWO - MODULES 6 TO 10

6

Capital Allocation and Use-Case Prioritisation

Where will AI create value worth the investment?

- Where AI creates value, and where it does not
- A practical filter that weighs return, **human impact and planetary cost**
- Build, buy or partner: how to decide

7

Humane AI: Ethics, Workplace Guardrails and Risk Controls

How do we protect people without slowing the business?

- Bias, accuracy and confidentiality risks in daily use
- A simple AI-use policy your teams will actually follow
- Controls that protect **people, data and trust** without slowing the business

8

Malaysian AI Governance and the Regulatory Landscape

What does Malaysia expect of us, in plain terms?

- AIGE's seven principles, the PDPA and BNM RMIT, explained simply
- AI Malaysia Berhad, MY-AISafe and the National AI Action Plan
- What each means for your organisation

9

Board Oversight and Decision Integrity

Who is accountable when AI shaped the decision?

- What boards and leadership teams should ask and review
- Accountability stays with people**, never with models
- Checking AI-assisted decisions before you act on them

10

Defining ROI and the 90-Day Implementation Plan

How will we know AI is paying off, and for whom?

- Measures of value for business, **people and planet**
- Build your own 30-60-90 day plan in the session
- Leave with owners, first steps and success measures

HOW WE LEARN

Hands on, every hour. Each module is practised, not presented. Bring your laptop.

Your real work. Your own tasks, documents and data are the material we learn on.

Malaysian context. Local regulation, local examples and local stakes throughout.

Human review, always. No AI output is trusted until a person has checked it.

*Efficiency is what AI gives you. **Wisdom is what you must bring to it.***

TRAINER PROFILE

LEARN, LEAD, TRANSFORM

Anupma Singh

AI and Growth Coach - Ebullient Consultancy LLP,
Founder - 10X AI Leaders

IIT Kanpur, India
Graduate

20+ Years
Experience

AI Coach
& Trainer

QUALIFICATIONS

- BTech, IIT Kanpur, India (1997–2001)
- Early hands-on exposure to AI and intelligent technology applications, beginning in 2001
- Expertise in bridging technology, business strategy and practical AI adoption

EXPERIENCE HIGHLIGHTS

- 20+ years of experience in AI, business growth and transformation, startups, software engineering
- Worked with global organisations and diverse industries
- Extensive experience in consulting, training, and solution delivery
- Known for translating complex AI concepts into practical business strategies

KEY TRAINING TOPICS

- AI Fundamentals for Business Leaders
- Generative AI in the Workplace
- Leading Digital Transformation
- AI-Driven Decision Making
- Building an AI-Ready Organisation
- Ethics, Governance and Responsible AI
- Future of Work and Skills for the AI Era

AREAS OF EXPERTISE

- Artificial Intelligence & Generative AI
- Digital Transformation Strategy
- Business Innovation & Growth
- AI for Business Decision Making
- AI-Powered Growth & Organic Marketing
- Leadership in the Age of AI
- Change Management
- Technology Adoption & Implementation

TRAINING STYLE

- Practical, case-study driven approach
- Real-world examples and industry insights
- Interactive and engaging sessions
- Focus on actionable takeaways
- Tailored to business and industry needs

WHO SHE WORKS WITH

- Senior Management & C-Suite Leaders
- Government Agencies
- Large Enterprises and MNCs
- SMEs and Growing Businesses
- Professionals and Emerging Leaders

“Empowering leaders and organisations to leverage AI for a smarter, more innovative and sustainable future.”
